[\\$ICE Legal Notes](#)

The ICE token (ticker symbol: ICE) is a native cryptographically-secure fungible protocol token of ICE Poker. The ICE token is a transferable representation of attributed utility functions specified in the protocol/code of ICE Poker, and which is designed to be used solely as an interoperable utility token thereon.

ICE is a functional multi-utility token which will be used as the medium of exchange between participants on ICE Poker in a decentralized manner. The goal of introducing ICE is to provide a convenient and secure mode of payment and settlement between participants who interact within the ecosystem on ICE Poker without any intermediaries such as centralized third-party entity/institution/credit.

It is not, and not intended to be, a medium of exchange accepted by the public (or a section of the public) as payment for goods or services or for the discharge of a debt; nor is it designed or intended to be used by any person as payment for any goods or services whatsoever that are not exclusively provided by the issuer.

ICE does not in any way represent any shareholding, participation, right, title, or interest in the Company, the Distributor, their respective affiliates, or any other company, enterprise or undertaking, nor will ICE entitle token holders to any promise of fees, dividends, revenue, profits or investment returns, and are not intended to constitute securities in the British Virgin Islands, Singapore or any relevant jurisdiction. ICE may only be utilized on ICE Poker, and ownership of the same carries no rights, express or implied, other than the right to use ICE as a means to enable usage of and interaction within ICE Poker. The secondary market pricing of ICE is not dependent on the effort of the ICE Poker team, and there is no token functionality or scheme designed to control or manipulate such secondary pricing.

Further, ICE provides the economic incentives which will be distributed to encourage users to exert efforts towards contribution and participation in the ecosystem on ICE Poker, thereby creating a mutually beneficial system where every participant is fairly compensated for its efforts.

ICE is an integral and indispensable part of ICE Poker, because without ICE, there would be no incentive for users to expend resources to participate in activities or provide services for the benefit of the entire ecosystem on ICE Poker. Given that additional ICE will be awarded to a user based only on its actual usage, activity and efforts made on ICE Poker and/or proportionate to the frequency and volume of transactions, users of ICE Poker and/or holders of ICE which did not actively participate will not receive any ICE rewards.

ICE Distribution

100% of \$ICE's supply was allocated for gaming rewards and DEX liquidity.

Gaming Rewards

90,000,000 \$ICE was minted into the DG Treasury and iceKeeper contract for ICE Poker rewards. This \$ICE will be distributed to players who play ICE Poker and complete daily challenges. The iceKeeper balance will be topped up once this initial allocation runs out.

DEX Liquidity

To allow players easy access to \$ICE, 50,000,000 \$ICE was minted and added to the DG Treasury for providing liquidity in the

•
\$ETH from initial wearable sales will be converted to \$USDC, combined with \$ICE, and deposited into this ICE-USDC pool. The DG Treasury will hold these LP tokens.

\$DG Legal Notes

The DG token distribution's goal is for \$DG tokens to be consumed and utilized — the Decentral Games ecosystem would fail if all \$DG token holders simply held onto their \$DG and did nothing with it.

In particular, it's highlighted that \$DG:

does not have any tangible or physical manifestation, and does not have any intrinsic value (nor does any person make any representation or give any commitment as to its value);

is non-refundable and cannot be exchanged for cash (or its equivalent value in any other virtual currency) or any payment obligation by the Company, the Distributor or any of their respective affiliates;

does not represent or confer on the token holder any right of any form with respect to the Company, the Distributor (or any of their respective affiliates), or its revenues or assets, including without limitation any right to receive future dividends, revenue, shares, ownership right or stake, share or security, any voting, distribution, redemption, liquidation, proprietary (including all forms of intellectual property or license rights), right to receive accounts, financial statements or other financial data, the right to requisition or participate in shareholder meetings, the right to nominate a director, or other financial or legal rights or equivalent rights, or intellectual property rights or any

other form of participation in or relating to the decentral.games ecosystem, the Company, the Distributor and/or their service providers;
is not intended to represent any rights under a contract for differences or under any other contract the purpose or pretended purpose of which is to secure a profit or avoid a loss;
is not intended to be a representation of money (including electronic money), security, commodity, bond, debt instrument, unit in a collective investment scheme or any other kind of financial instrument or investment;
is not a loan to the Company, the Distributor or any of their respective affiliates, is not intended to represent a debt owed by the Company, the Distributor or any of their respective affiliates, and there is no expectation of profit; and
does not provide the token holder with any ownership or other interest in the Company, the Distributor or any of their respective affiliates. Notwithstanding the DG distribution, users have no economic or legal right over or beneficial interest in the assets of the Company, the Distributor, or any of their affiliates after the token distribution.

DG Distribution

1 billion \$DG tokens were minted and will become accessible over the next 6 years.

62% to the community:

33% to DG Treasury: DG Treasury tokens are vested into the DG Treasury. \$xDG holders can vote on these token allocations.

16% to ecosystem support: Ecosystem support tokens will be allocated to help develop new games and incentivize strategic partners to grow the Decentral Games ecosystem.

9% to liquidity incentives: LPs receive \$DG token incentives by providing early liquidity and staking their LP tokens. (*Note: As of November 2021, all of these tokens have been emitted for rewards.*)

2% to governance rewards: \$DG token holders can earn additional \$DG by staking in the governance contract.

- 2% to community airdrop: These tokens will be airdropped to active community members.
-

20% to DG team and future employees with 3-year linear vesting.

18% to early participants with 2-year linear vesting.

xDG

What is xDG?
